SELF-SERVICE KIOSKS: WALL-MOUNT INSTALLATION INSTRUCTIONS

1. Connect the EFTPOS TERMINAL POWER CABLE

2. Secure the EFTPOS TERMINAL BRACKET to the kiosk BODY with 2 screws provided (refer to guide)
- Tightly secure the screws to prevent the **EFTPOS TERMINAL** from moving
- If you require further security, M4 & M3 Security Torx Screws can be purchased and used as an alternative

3. Bolt the WALL MOUNT to the intended installation point through the 4 pre-drilled holes*
- To ensure your safety, please make certain that the **WALL MOUNT** is securely fastened to the surface prior to adding the kiosk **BODY**

4. Secure the kiosk BODY to the WALL MOUNT
- Use two people
- Have one person support the kiosk **BODY** whilst the other person assists to guide the **BODY** onto the **WALL MOUNT** via the existing mounting hooks
- Thread additional screws through the mounting hooks to lock the kiosk into place*

5. Connect power to the kiosk and EFTPOS TERMINAL
- Black socket = EFTPOS terminal power
- Silver socket = kiosk power

6. Turn on your kiosk and EFTPOS terminal

7. Fix the CABLE TIDY BRACKET to the kiosk BODY with 4 screws provided (refer to guide)

Congratulations! Your NewBook Self-Service Kiosk is now ready to use!

*Bolts and additional screws not supplied. Suitable bolts will need to be chosen depending on the installation point surface type.
